

Group Submission AI Interaction Log (Insufficient example)

Prompt

How do we import a CSV file in R

AI response excerpt

Use readr read_csv. Then use glimpse and summary. Use lubridate for dates. Use na to handle missing values.

What we did

We imported the file with read_csv.

Problems with this log

1. Only one prompt
2. No prompt goals
3. No annotations about what AI got right, assumed, or missed
4. No dataset specific references
5. No evidence of iteration or purposeful prompting
